

Starter Datasets

This directory contains two independent datasets for the fact knowledge layer assignment:

- `delhivery/` - three company documents covering corporate, operational, and financial facts across different disclosure formats and dates.
- `india-macroeconomy/` - three institutional reports covering overlapping facts about the Indian economy from different publishers and data vintages.

Each dataset has its own README with document provenance and details of any curated excerpts.

Starter Dataset

This folder contains a curated set of public Delhivery documents for the assignment. The two longer source documents have been reduced to 100 PDF pages while preserving the sections most relevant to fact extraction and cross-document reconciliation.
